Experience

Yandex · Frontend Developer January 2023 – June 2025

Development of an admin panel for a B2B product — an internal system for managing informational blocks in the application

- Built the architecture of a new module as a developer, aligned the approach with the team, and implemented a unified UI pattern with reusable components
- Configured integrations with external systems and microservices; implemented business logic for displaying informers
- Built a decentralized JSX component with multi-field localization: collects keys, aggregates translations, and synchronizes centrally with an external system — no providers or stores required. Implemented as a singleton with zero configuration
- Developed a dynamic form preview to display live data without reloads or additional client load. The interface is stable and responsive
- Conducted regular team code reviews, maintained architectural integrity, and helped onboard new colleagues
- Stack: React, Redux, React Hook Form, Yup, React Query, TypeScript, AWS, BEM, HTML, CSS, Node.js, TypeORM, Jest, Webpack, Docker, Kubernetes

Sber · Lead Engineer October 2019 – September 2022

Development of a SPA interface for processing enforcement documents

- Designed and implemented a modern SPA interface, replacing the outdated solution
- Reduced document processing time and minimized errors during data entry
- Stack: React, TypeScript, Redux, React Hook Form, React-JSS, Jest

Intermobility · Web Developer July 2019 – October 2019

Frontend development of Vue.js applications. Stack: TypeScript, Vue.js

Infogorod · Lead Software Engineer January 2018 – July 2019

Involved in the development and maintenance of a utility billing system

- Developed several frontend services to improve control over calculations
- Optimized interfaces to reduce response times and improve stability
- Stack: TypeScript, React, Node.js, ExtJS, MobX

Cruise House “MK” · Frontend Developer August 2016 – December 2017

Built a SPA application using JavaScript/jQuery for a booking service. Stack: JavaScript, jQuery, NodeJS, Twig, Gulp, HTML, CSS

Aktikom · HTML Layout Developer March 2016 – June 2016

Landing page layout and mobile adaptation. Stack: HTML, CSS, jQuery

Skills

JavaScript, TypeScript, Next.js, Node.js, Astro, React, Redux, MobX, React Hook Form, React Query, Preact, TypeORM, Yup, BEM, AWS, HTML, CSS, SCSS, Tailwind CSS, Styled Components, Jest, Webpack, Docker, Kubernetes

Education

Samara State Technical University — Mechanical Engineering, Specialist, 2002–2008

Samara State Technical University — Electric Power Stations, Bachelor, 2010–2014

Bauman Moscow State Technical University — Courses: React, Databases, 2018

Online: javarush.ru (Java),
htmlacademy.ru (Web)

Languages

- Russian — Native
- English — B1
- Spanish — A2

Interests

Personal development, technology, karting, design
